| DIVISION | STATES | REGION |
|--------------------------|---|-----------|
| Mountain [M] | Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming | WEST |
| Pacific [P] | Alaska, California, Hawaii, Oregon, Washington | |
| East South Central [ESC] | Alabama, Kentucky, Mississippi, Tennessee | SOUTH |
| West South Central [WSC] | Arkansas, Louisiana, Oklahoma, Texas | |
| South Atlantic [SA] | Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia | |
| West North Central [WNC] | Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota | MIDWEST |
| East North Central [ENC] | Illinois, Indiana, Michigan, Ohio, Wisconsin | |
| New England [NE] | Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont | NORTHEAST |
| Middle Atlantic [MA] | New Jersey, New York, Pennsylvania | |

"Crude Rate" refers to rates per 100,000 population. "Age-Adjusted Rate" refers to rates that are calculated as if the deaths occurred in a population with the same age structures. As the CDC website explains, "Some injuries occur more often among certain age groups than others. For instance, falls are more common among the elderly than among any other age group. Age adjustment enables you to compare injury rates without concern that differences are because of differences in the ages distributions between different populations or for the same population over time." Caution: Crude rates and age-adjusted rates cannot be directly compared to one another (that is, crude rates should only be compared to other crude rates and age-adjusted only to age-adjusted).

Crude Rate refers to rates per 100,000 population.
